ACOUSTIC ENCLOSURE

Noise enclosure for mechanical equipment

Turnkey Installation available as an option	**3 sectors** Commercial, industrial, residential	**Quebec** Made in Quebec, Canada

DESCRIPTION

Deflection acoustic enclosures offer a high-performance solution for reducing noise from mechanical equipment in commercial, industrial and residential environments. Compatible with installations such as heat pumps, dust collectors and fans, these enclosures provide optimum sound insulation.

Installation is available as an option, for a turnkey service tailored to your needs. Made in Quebec.

APPLICATIONS

- Commercial
- Industrial
- Residential

IDEAL FOR

- Mechanical equipment
- Heat pumps
- Dust collectors
- Fans
- And more

Note: Research and development is an ongoing process. As improvements are made, specifications and dimensions may change without notice. Dimensional tolerances conform to international standards.
