ACOUSTIC SILENCERS

Custom-built duct silencers

ASTM E477 Built to the criteria of the standard	**3 shapes** Straight, elbow, round	**Quebec** Made in Quebec, Canada

DESCRIPTION

Deflection acoustic silencers are custom-built to meet the specific requirements of your projects, to the criteria of ASTM E477 for optimum acoustic performance. Available in galvanized, satin-finish or stainless steel, and in straight, elbow or round configurations, they adapt to your needs.

With options such as lifting rings and protective facings, these silencers provide effective, long-lasting sound attenuation. Made in Quebec.

AVAILABLE OPTIONS

- Lifting rings
- Protective film for the acoustic media (Tedlar, Melinex and/or fiberglass cloth)
- Modular silencers

MATERIALS AVAILABLE

- Galvanized steel
- Satin-finish steel, painted to the customer’s choice
- Stainless steel

SHEET GAUGES AVAILABLE

- 16 ga
- 18 ga
- 22 ga
- HTL (high transmission loss)

SHAPES AVAILABLE

- Straight
- Elbow
- Round

Note: Research and development is an ongoing process. As improvements are made, specifications and dimensions may change without notice. Dimensional tolerances conform to international standards.
